A BEDTIME STORY

A peaceful day ends with a wild night when a character is awoken from a deep sleep by a visit from Cronos, Goddess of the Future. She comes to warn of a dire situation, and to ask your help. The Arcana, mystical cards, have fallen into the dimensional cracks we call dreams. The energy of each card will be out of balance unless someone brave and skillful can enter the dream world and seal each card. Each card has five challenging puzzles which must be solved in order to seal the card. It won't be easy, but Cronos—and the whole universe—are counting on you to see this difficult task through to the end! If you meet this challenge, you will be greatly rewarded. Do your best to burst the bubbles and seal the cards!

Select the desired mode by pressing **UP** or **DOWN** on the **DIRECTIONAL PAD** and start the mode by pressing the **A BUTTON**. Select **Explanation of the Pulley** for information on how the pulley system works.

Arcade (One Player)

The object of Arcade mode is to clear a round by eliminating all the bubbles on the playfield. With difficulty set on **"EASY"**, you'll play with help from the bubble launcher guideline. Normal difficulty raises the level to average and eliminates the guideline. Remember, the abilities of the various characters are not applied in this mode. You are offered a choice of rounds (1- 2) for every 5 rounds that you clear. An ending sequence will be deployed if you clear the final zone.

Story

Choose a character, then go back to the story of Cronos, Keeper of the Forest unfolds (press the **A BUTTON** to play the story). Then select any of several available cards by pressing **LEFT** or **RIGHT** on the **DIRECTIONAL PAD** to move the highlight to a desired card and confirm by pressing the **A BUTTON**. You will then play the five puzzles associated with that card. Once you have mastered these puzzles, that card is sealed and you can choose any of the remaining cards. Continue in this way until you have completely sealed all the cards. It is a long process, but when you have sealed all the cards, you will get a special surprise!

Collection Mode

Collection mode offers a vast collection of some of the best **EUST-A-MOVE** puzzles ever created. There are over 200 different puzzles from our top designers, so buckle down for a funfest!

PLAYER VS. COMPUTER

Player vs. Computer mode offers two different games in which you can compete against the CPU-controlled characters: **Story** and **Win Contest**. That's twice as much bubble-busting fun! Select the desired mode by pressing **UP** or **DOWN** on the **DIRECTIONAL PAD** and start the mode by pressing the **A BUTTON**. Select **Explanation of Game Rules** for information on how the game system works.

Story (Player Vs. Computer)

Choose a character and listen to the story of the Rainbow's theft. The Moon Queen has stolen all of the bubble colors that make up the rainbow. It is your job to win back each colored bubble by competing against CPU-controlled characters on a round-by-round basis. Eliminate as many bubbles as possible or drop bubbles into your opponent's playfield. You win when your opponent's bubbles push past the **STABLINE**. When you win, you proceed to the next round and a new opponent in the story continues. The game is over when you lose a round. An ending sequence will be displayed when you clear the last round. Remember, the character you select is directly related to the type of bubbles you drop on your opponent. (The character select screen illustrates which bubbles will be dropped on your opponent when you complete each character's list.)

Win Contest

Choose a character and compete against each CPU-controlled character to build up a succession of wins. One loss ends the game. Each win reveals more of the puzzle (you'll get a glimpse of the puzzle even if you lose, but more wins unscrambles it even more!). Follow the same rules as Story mode to defeat your opponent.

PLAYER VS. PLAYER

Select your player. Press either **LEFT** or **RIGHT** on the **DIRECTIONAL PAD** to select and confirm your selection with the **A BUTTON**. Then you can select a backdrop that will serve the playing field if you and your partner's skill levels differ. From here, the rules are the same as Player vs. Computer but this time it's your buddy (not some CPU) opposed you in dumping bubbles on! (Remember the character you select is directly related to the type of bubbles you drop on your opponent like the character select screen illustrates which bubbles will be dropped on your opponent when a you complete each chase sequence)

CHALLENGE MODE

Challenge mode affords 5 different challenge stages, each with 5 rounds. Try your hand at each different challenge, then see how you did in the evaluation screen!

Stage Map

On the **CHARACTER SELECTION SCREEN**, choose a character by pressing **LEFT** or **RIGHT** on the **DIRECTIONAL PAD** and decide your choice with the **A BUTTON**. The composition of the rounds will vary in accordance with the selected character.

Begin Gameplay

Each stage commences with 5 rounds. Clear the stage for a higher score. You will progress even if you don't clear the stage but your score will be significantly lower.

Once you've cleared each stage, an evaluation screen will be displayed, followed by the next stage of the game.

Grade

When all stages are cleared, the player will be graded according to performance and technique.

SPECIAL BUBBLES

The bubbles described below have special properties

STAR BUBBLE

Contact with a bubble will eliminate all bubbles of the same color

RAINBOW BUBBLE

When in contact with an eliminated bubble, it will adopt the color of that bubble

BLOCK BUBBLE

Although blocks can't be eliminated, you can still clear a row if they're on the playfield or not

BUBLOCK BUBBLE

Similar to Block Bubbles, a Bublock can be removed by eliminating all the surrounding bubbles in contact with it. However, you cannot clear a row if a Bublock is still on the playfield

THE CHARACTERS

Depending on the opposing character, bubble attack combinations will vary.

BUB and BOB

The twin brothers who live on the Planet Bubbletune. Bob is the older brother. He is energetic and cheerful. Bob, the younger of the twins is the quiet, reserved type. The twins are the heroes of this story.

ALKANET

She is a graceful princess from the planet Freese. She is tough-minded and loves her planet. Woe be to anyone who causes harm to her planet. She is willing to take a voyage, in order to retrieve the lost color bubbles.

MARINO

He's the son of Queen Nefela of the planet Wavy. He's a straight forward character, but a bit of a simpleton. He embarks on a journey to find the "meaning", because the Kingdom of the Sea was reigned up by the incident.

KURCL

She is a Boly from the Gommor planet where people are always caricatured. She is a head-back character who loves to sabotage and take naps. Her journey will be in search of the "meaning" and the character "Sassa" (Both of which remain missing).

TANTAM

He is the Lord Protector of the dense Neeja planet. He is the father of the wind and the earth, and is capable of being hostile or gentle. He vanes moderate of evil, and soars into space in pursuit of the wanderers of right. The night which now never ends, the morning which never comes.

CLEON

The Fairy of the Night. She is elegant and mysterious. She is the schemer of Full Moon Madeline Luna, who is the main character involved in the incident. Cleon secretly harbors ambitions to overthrow Madeline Luna, and assume the role of The Conqueror of the Night.

GIGANT

He is a chief security guard at a once magnificent, but now ruined castle on the planet Gothic. He continued to protect the castle despite the devastation around him. But one day, he fell under the seductive beauty of a rainbow bubble and for the first time felt the power to follow his own will. I want that beautiful thing.

DEVELON

He is the alter-ego of Baff who lives on the Planet Double. He's always conspiring to cause harm and inflict damage, and he is the arch-enemy of Bab and Bubbleton. However, truth be told, he is nothing more than a lonely coward.

BRAMB

He is a mad scientist from the planet Mizaru. He had been devoting a great deal of time to developing his ultimate magic trick, which was near completion when light, the main source of his pending research, suddenly vanished! When he finally learned the truth about the accident, he immediately began to plot a way to control light with the rainbow bubbles.

G

An old, mysterious man who lives on the planet Zinksee. No one knows his real name, and everyone refers to him only as G. There's a rumor that he likes tea. Also, when he is sharp he is quite beautiful. *

HINTS & TIPS

1. Study the way the puzzle is constructed, and how the bubbles are suspended. Note which bubbles are 'anchored' bubbles (bubbles which have a string of bubbles suspended from them). Often, choosing a particular strategically placed bubble will cause an entire puzzle to go away!
2. Practice bouncing/popping your shots off the sides. This is the true way to mastering the game (once you're good at doing this, you'll be able to pull off the tough shots that save the day!)
3. Fire rapidly! As soon as you have your shot lined up, don't hesitate, shoot! Fire one right after another when bubbles are the same hue.
4. Watch your indicator to see what the next bubble is. A big part of a successful strategy is seeing the current bubble in anticipation of where you'll shoot the next one!
5. When playing an opponent (Human or CPU), make sure to set up your shots immediately. This goes as trapping a few bubbles off of two like-colored bubbles so that you'll be able to send 'blocking' bubbles over to your opponent after you've dropped your handle!
